# Problem

- There are currently no pedestrian facilities on Ocean Street south of Gosnold Street
  - Opportunity to improve pedestrian safety and accessibility
- Additional risks:
  - Kalmus Beach entrance is located on a sharp curve
    - Location lacks proper sight distance for safe turning movements
  - There is a dead-end in the watermain from the Yachtsman Condos to Hawes Ave.
    - Dead-ends can result in impacts to water pressure; inadequate fire flows; and potentially reduced water quality

# Project Goals for Ocean Street

- Improve pedestrian safety and accessibility on the southern portion of Ocean Street by constructing improved pedestrian facilities, including sidewalks and crosswalks
- Improve traffic safety at Kalmus Beach by relocating the access drive
- Improve drinking water distribution and fire protection in the area by creating a looped system

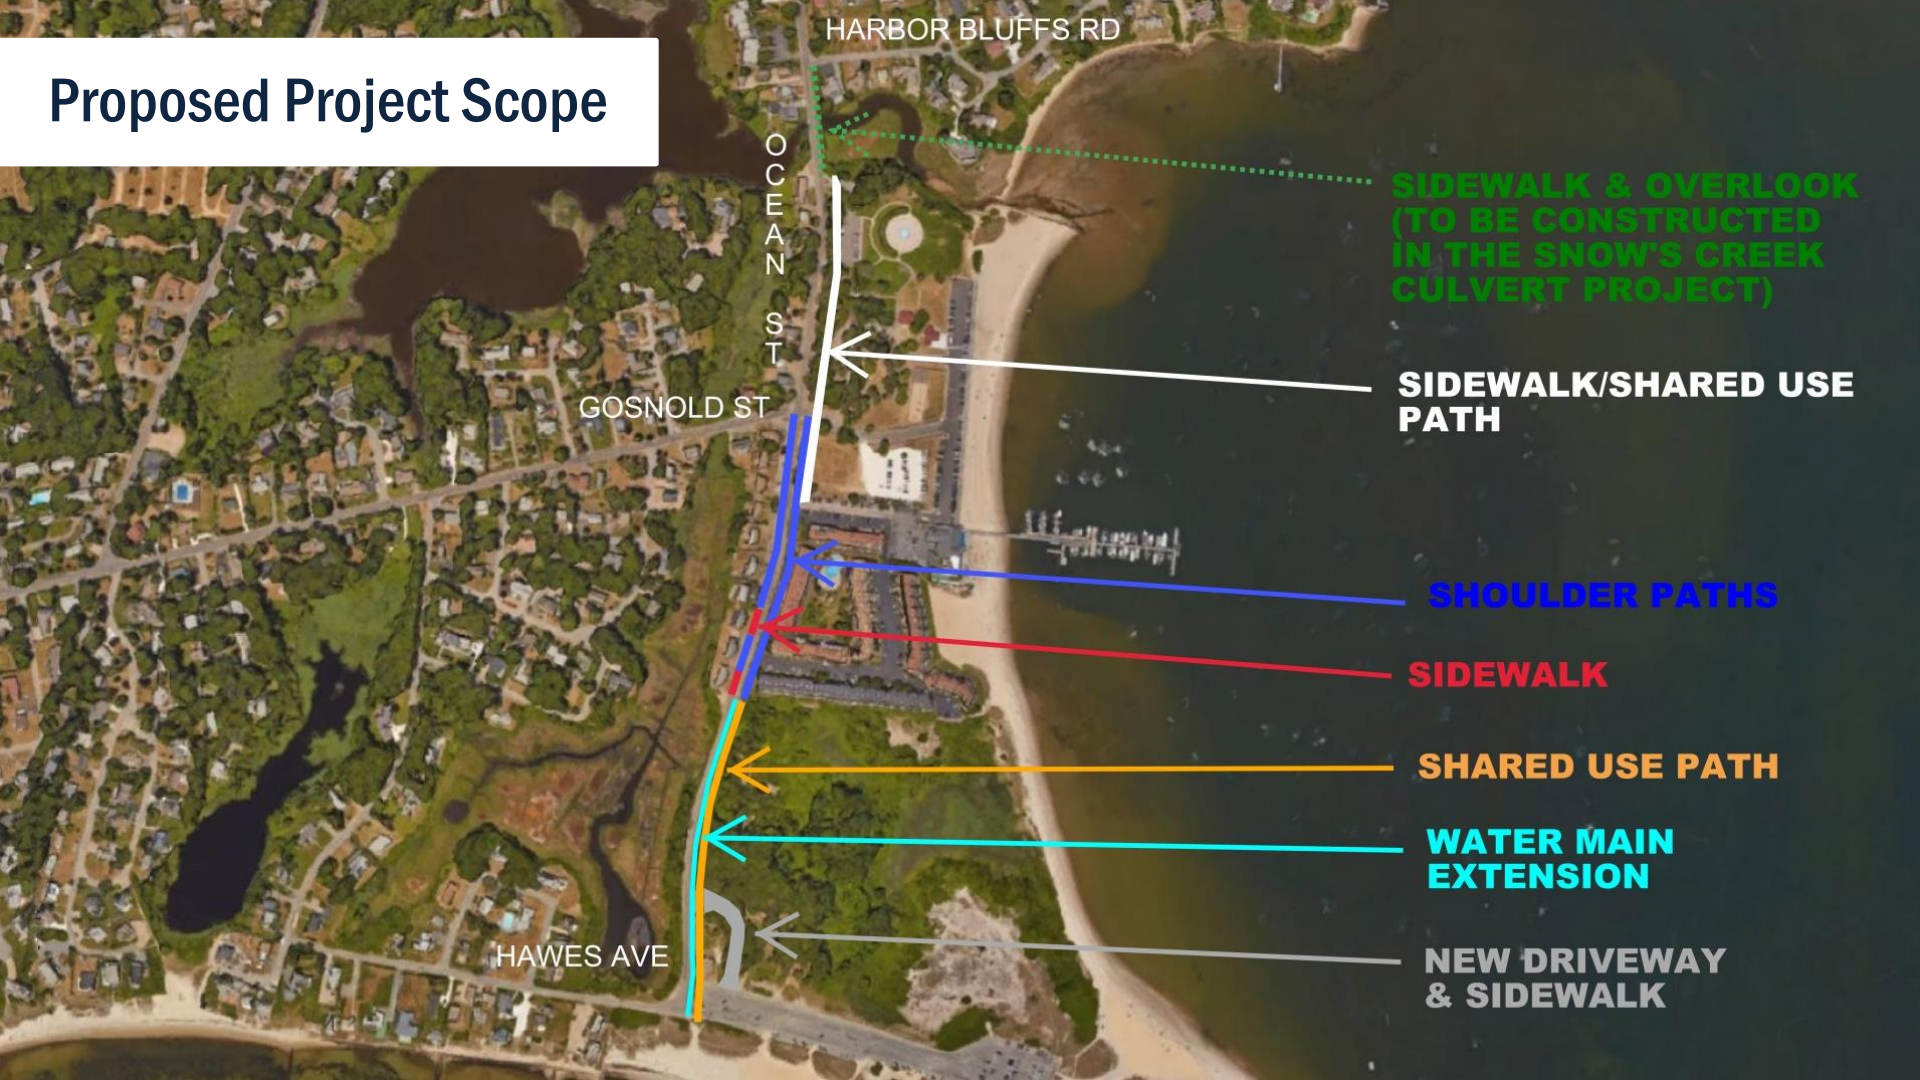

# Project Features

- **Pedestrian Facilities**
  - Sidewalks
  - Shared use path
  - Shoulder path
  - New driveway
- **Additional Lighting**
  - Currently every other, or every two, utility poles have lighting; proposal includes adding lighting to all existing utility poles
